

Repairs and home maintenance

Keeping your home
in good repair

Our skilled repairs team are trained to carry out a range of repair jobs.

This guide explains how our repairs service works, and the steps you need to take if there's an issue in your home.

Remember, you are also responsible for the general maintenance and good upkeep of your home. You'll find all the information you need to keep your home running smoothly in this guide.

How to report a repair

If something goes wrong in your home, there are simple ways to tell us about it.

- Sign in online at **whg.uk.com** to report your repair and choose your appointment slot
- Call **0300 555 6666 (Monday-Friday 8am-6pm)**. Emergency repairs can be reported 24 hours a day on the same phone number
- Email **enquiries@whgrp.co.uk** with your name, address, phone number and details of the problem. We aim to respond to emails within five working days.

Before contacting us please double-check it isn't your responsibility to fix (see page 12).

Repair appointments

Routine repairs are carried out on weekdays from 8am-6pm. We offer these time slots, subject to availability:

- Morning, 8am-2pm
- Afternoon, 12pm-6pm
- All day, 8am-6pm
- Avoiding the 'school run', 10am-2pm.

We will confirm your appointment with a text or letter, or over the phone if you have called us.

Although we will do our best to keep to your appointment, sometimes we may need to change it. For example, if we do not have the part needed for the repair.

We do not give appointment slots for communal repairs.

What happens on the day?

On the day of your appointment, a responsible adult must be there to let us in and while work is being carried out.

Anyone we authorise to enter your home will carry identification. Always ask to see it before letting callers into your home and be aware there may be bogus callers operating in your area. If you have any concerns, call us on **0300 555 6666** to confirm they are who they say they are.

If we need to replace something in your home, where possible we will replace it with an identical or matching item.

Repair appointments (continued)

How long will I have to wait?

You can use your online account to report your repair and choose from our best selection of appointments. Otherwise, your repair will be scheduled for the next available appointment.

How do I cancel or change a repair appointment?

If you can't make the appointment, you can cancel a repair online up to 24 hours before. Sign in to manage your home online at whg.uk.com and follow the instructions.

To change an appointment, or if you need to cancel on the day the repair is due to take place, you must call us on **0300 555 6666**.

What do I do if I'm not happy with a repair?

If something is wrong, it's important that you tell us so we can put things right.

You can find out more about making a complaint online at whg.uk.com

Emergency repairs

Problems that pose an immediate risk to safety, security or health are classed as an emergency.

0300 555 6666 The emergency repair line is open 24/7.

We respond to emergencies 24 hours a day, every day of the year.

A colleague will attend the same day of the report to make safe and will try to complete the full repair within 24 hours.

You may be charged if you tell us the problem is an emergency when it isn't – for example, if you tell us a small water leak is a flood (see page 9). If in doubt, it's best to call us and we will help you diagnose the issue.

Examples of emergencies include but are not limited to:

- Faulty electrical systems and wiring
- Smell of gas, faulty gas appliances or heating systems
- Dangerous objects like loose roof tiles or broken windows
- Severe water leaks that can't be contained.

What to do in an emergency

If you suspect a gas leak

If you think you smell a gas leak, it's important to take action right away:

- Put out all naked flames and cigarettes
- Do not switch on any appliances, lights, doorbells or mobile phones
- Check if your gas tap, fire or cooker has been turned on accidentally
- Open doors and windows to get fresh air circulating
- Turn off the gas supply (the lever is usually next to the gas meter).

If the gas leak continues:

- Get out of your home
- Call the national gas emergency number on **0800 111 999 (24/7)**
- Then call us on **0300 555 6666 (24/7)**.

If you have a water leak

A severe water leak that cannot be stopped or contained is classed as an emergency.

Small water leaks from waste traps or pipes that only occur when the fixture (like a sink or bath) is being used can be reported as a routine repair.

If you have a severe water leak:

- Place a bucket or container underneath the leak, and put down towels to help soak up the water
- Turn off the water supply to the appliance/area if possible, or turn off the mains water at your stop-tap
- Call us on **0300 555 6666 (24/7)**.

What to do in an emergency (continued)

If pipes are frozen

A frozen water pipe that has burst or cracked is classed as an emergency if it is causing a severe water leak.

Turn off the mains water at your stop-tap, then call us on **0300 555 6666 (24/7)**.

If electrical items have got wet, do not touch them and switch off your electricity at the mains.

If the frozen pipe is not damaged, you can take steps to fix the problem yourself:

- Turn on the tap nearest to the frozen section of pipe
- Warm the pipe slowly with a hairdryer or hot water bottle, keeping it moving by running it back and forth along the affected section until water starts to flow again. Do not use boiling water
- Wait for water to start flowing as normal.

If you have a power cut

A power cut could be an emergency if it is caused by faulty electrical systems or wiring in your home.

If you suspect this is the case you should call us on 0300 555 6666 (24/7).

However, most power cuts are due to a local fault affecting your area, or a faulty household appliance or lightbulb tripping a switch on your fuse board.

If this is the case, you can usually work out the cause of the problem yourself:

- Check the fuse board to see which area of the house has the fault which tripped the switch
- Switch off and unplug all appliances in that area
- Reset the tripped switch to the upright position on the fuse board
- Plug in and switch on each appliance one at a time in the identified area until you find the faulty one which is tripping the switch
- If you reset the fuse board but are still having problems with your power cutting out, please report this as a repair.

how to check
your fuse board**

Who is responsible for what

Remember that you are also responsible for the general maintenance and good upkeep of your home.

We are responsible for repairing your home's structure and fixtures to keep the property in good condition.

You are required to keep your home in good decorative order and ensure fixtures and fittings are maintained so they do not cause a danger to anyone or damage the property.

Below is a guide to who is responsible for some common repairs. If your issue is not listed here, report the repair online for more guidance. For emergency repairs, see page 8.

	whg	you
Basins and sinks		
Basin or sink is blocked		✓
Plug and chain is broken or missing		✓

Preventing and dealing with frozen pipes		✓
Manhole is overflowing		- your water supplier
Gully is blocked		✓
Water pipe is leaking	✓	
Cold water tank is leaking	✓	
Manhole cover on your property is loose	✓	

Rechargeable repairs

We do not charge you for repairs needed through normal wear and tear, but we will charge you if the repair is:

- needed due to neglect or damage you have caused
- your responsibility to fix (see page 12)
- missed because no one was there to let us in at the arranged appointment time
- reported as an emergency when it isn't.

Decoration and home improvements

What you can do

You can paint and decorate inside your home and carry out minor DIY jobs such as putting up shelves or curtain rails.

But you cannot make major changes to the property itself without our permission – so it is important that you check with us first before carrying out any work.

Examples of what we will and won't give permission for can be found in our Home Improvement Policy, which is on our website.

What we do

We have a planned programme of maintenance and improvement work which we carry out to maintain the quality of homes.

This includes routine maintenance as well as more major work such as replacing kitchens and bathrooms, upgrading heating systems and fitting new windows.

You will not need to contact us in order to be considered for these upgrades.

Repairs in new-build homes

If you have moved into one of our newly built homes, any faults or problems that need fixing within the first 12 months are known as defects.

The developer is responsible for putting these defects right, so if you find any such faults, please report them to us straight away. We will then arrange for the developer to carry out the repair.
